

Student Voices: Taking Notes (Group 1)

[00:00:00.00]

[00:00:00.36] When I'm taking notes during a lecture, I try to get the main points, the main stuff that is needed that I say, OK, this might be on a test. The extra stuff, I don't write down. I review my notes after class to help reiterate what was said and what I wrote down just to keep it fresh in my mind.

[00:00:20.12] One thing I do do, when I take notes, is write down exactly what the professor says but next to it right down my paraphrase so that I make sure my paraphrase isn't missing anything.

[00:00:31.27] Make sure that you listen for key words. When my instructor says something like this is important or you're going to see this again or this may be on the test, those are the best ways to take notes. Because, if you actually listen to key words that your instructor says, you'll definitely do well on your test.
