

Use of White Space on Presentation Slides

Ineffective use of white space

A blue textured slide titled "Service Learning Components" with four bullet points. The text is dense and lacks sufficient white space around the text and between the bullet points.

Service Learning Components

- Training workshops--2 a week for the first 2 weeks of the semester
- After-school tutoring--3 two-hour sessions per week at designated school
- Journal-keeping--1 entry per session
- Submission of journal and final report--report should describe 3 most important things you learned and should be 5-10 pages

Too much text and too little "white" space make slide hard to read.

Effective use of white space

A blue textured slide titled "Service Learning Components" with four bullet points. The text is sparse and has more white space around it, making it easier to read.

Service Learning Components

- Training workshops
- After-school tutoring
- Journal-keeping
- Submission of journal and final report

Less text and more "white" space make each point easier to read.

Bullets effectively highlight only the main points. More explanation is appropriate in the accompanying presentation.
